Dear Lidia Sandra,

References should be presented in **a full form** in the same way as they are presented in Google Scholar (APA style).

Rearrange references in APA style, for example:

1. Sudjana, N. (2010). Penilaian Hasil Proses Belajar Mengajar.(Cet. XV). *Bandung: PT. Remaja Rosdakarya.*

Remove the links in the references, the content in the reference that is visible in Google Scholar is sufficient. Exceptionally you can use a reference that is not in Google Scholar, but then provide a link to it.

Check other references you have used.

Dear Lidia Sandra,

More references in your work are not shown at the required level. According to our criteria, references are extremely important for the quality of paper. When using a link to a reference, add an access date.

Preferably, all references should be visible in Google Scholar. References should be presented in a full form in the same way as they are presented in Google Scholar (APA style).

If the certain reference is not in the Google Scholar and there is a need to write it down, then the link should refer to the content that you have used in your paper, not to some overly extensive material in which we can hardly find what you have used or written in the paper.

Correct all the references that are not presented in the paper in required manner. After the corrections you should send us your paper again as soon as possible.

We have asked you to correct the references. You have changed the citation style. The citation method in the first version is good, but not all references are complete or not visible on the Internet. You do not need to change the Citation style. References should be presented in exactly the same way as they are presented in Google Scholar (APA style).

Read the previous message we sent you.
