Dear Lidia Sandra of the Paper number 1570779581,

We do apologize if you receive several emails from us. This happened due to an error in our EDAS system.

Congratulations!

We are pleased to inform you that your paper has been accepted by ICAMIMIA 2021 International Conference, to be held from 8th - 9th December 2021 by online.

The Technical Program Committee found that your paper needs some improvement in order to meet the the standard of IEEE. Some issues related to paper submission of IEEE Explore are:

1. Please refer to the standard of IEEE template for your paper format. The template could be reached in the website of IEEE as well as ICAMIMIA 2021.
2. The committee of ICAMIMIA is not responsible when IEEE do not include the paper for publication in the electronic publication of IEEE Explore for such reason stated above.
3. Please consider some LAYOUT REVISION suggestion which could be found in EDAS.
<https://edas.info/showPaper.php?m=1570779581>
4. ICAMIMIA 2021 committee also offer you a proof read facilities, for further information please contact us at icamimia@gmail.com or by WA number (check our website).

We hope you submit the revision of the paper to the EDAS, before 31st October 2021.

You can upload the revision by following this link <https://edas.info/showPaper.php?m=1570779581>

Please check our website for your Early bird registration deadline.

We are strongly consider to ACCEPT your paper after you fulfill our requirements. Otherwise, your paper will be rejected if you can not fulfill our suggestion.

Best Regards,
The Committee of ICAMIMIA 2021.

===== Review Paper 1 =====

> *** Detailed Review and Comments for Authors: Please provide a detailed review, including justification for your scores. This review will be sent to the authors unless the PC chairs decide not to do so.

It would be beneficial if the authors would provide some explanation how the classified/clustered/aggregated information from the studies on SNA are being applied in practice, i.e. market studies, electoral voting, etc.

On a side note, I had to disagree with the statement: health and technology as a topic of research are still lacking in numbers of research done. This seems to be due to the limited scope of the review rather than the availability of studies outside, notably given the numerous studies related to Covid, e.g. DOI:10.1038/s41598-021-87837-0

===== Review Paper 2 =====

> *** Detailed Review and Comments for Authors: Please provide a detailed review, including justification for your scores. This review will be sent to the authors unless the PC chairs decide not to do so.

1. Reference should be appear in sequence from [1] [2] and so on. In this paper for example after reference [5] it is jump to [39]
2. Please give a heading for the reference section
3. In conclusion, it will be better to give the summary of this research before explain the future research agenda
