AUTHORS: Oki Sunardi

Recommendation for this paper 65:

The abstract should be provided with some keywords. Indicative results of the study should also be added at the later part.

Numbering of the references should be in the netral [x] format, not uplifted.

Some examples of topic or subject being discussed in the informal knowledge-sharing sessions should be given so that the reader have some insights into the practice.

An elaborate indication of study methodology after the development of hypothesis should be added, which leads to the conclusion.
